NodeRag Two Column Extraction Fixture

Read the left column from top to bottom, then the right column.

LEFT COLUMN 1

The archive stores maintenance procedures.
Each procedure has an owner.
Review dates are explicit.

LEFT COLUMN 2

Unicode remains searchable: cafe and resume.
These sentences stay together.

RIGHT COLUMN 1

The index stores canonical Markdown.
Original files remain downloadable.

RIGHT COLUMN 2

Right text follows all left text.
Interleaving is an extraction failure.
